SAFETY ALERT SYMBOLS
Safety Symbols alerting you to potential personal safety hazards.
Obey all safety messages following these symbols.

WARNING
Avoid possible injury or death

CAUTION
Avoid possible injury and/or property damage

FOR YOUR SAFETY
READ ALL INSTRUCTIONS BEFORE OPERATING APPLIANCE

Installer: Provide these instructions to the consumer.
Consumer: Keep documents for future reference.

WARNING
FIRE OR EXPLOSION

FOR YOUR SAFETY
WHAT TO DO IF YOU SMELL GAS
• Open windows.
• Do not touch any electrical switch, or use any phone or radio in vehicle.
• Extinguish any open flame.
• Evacuate all persons from vehicle.
• Shut off gas supply at gas container or source.
• Do not start vehicle’s engine or electric generator.
• Contact nearest gas supplier or qualified Service Technician for repairs.
• If you cannot reach a gas supplier or qualified Service Technician, contact the nearest fire department.
• Do not turn on gas supply until gas leak(s) has been repaired.

FOR YOUR SAFETY
DO NOT store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

WARNING
EXPLOSION OR FIRE

• Shut off all gas appliances and pilot lights when refueling gasoline tanks, LP tanks or when vehicle is in motion.
• Atwood & Wedgewood gas operated cooking appliances are for use with LP gas only, and for installation in recreation vehicles only (e.g. travel trailers, motor homes, tent campers, etc.).

WARNING
CARBON MONOXIDE POISONING
• Do not use cooking appliance for space heating. It is a potential danger to occupants of vehicle and damage to operating components of the range/cooktop.
• A window or air vent should be open slightly while using any cooking appliance. Gas flames consume oxygen which must be replaced to assure proper combustion.

WARNING
CARBON MONOXIDE POISONING
The cooking appliance must be completely separated and/or sealed from other air moving or air consuming devices such as, but not limited to, furnaces, microwave ovens, clothes dryers, cooling fans and doors or drawers in common cabinets. Failure to do so will affect the appliance(s) combustion air supply by creating either a negative or positive draft.
• Negative draft caused by air moving appliances may draw the top burner flame down into or toward the cooktop resulting in cooktop damage, burn hazard, explosion possibility and/or carbon monoxide buildup.
• Positive draft may blow out the top burner flame during use resulting in an explosion and/or fire hazard and/or injury to the occupants of the vehicle.
• Do not operate the appliance in excessive windy conditions as this may cause a negative or positive draft.

1. For proper operation of your cooking appliance:
   The housing cabinet must be:
   • properly constructed.
   • squared to the countertop and cabinet face.

2. For ranges, the cabinet opening must be constructed so that no combustible material can be placed next to the range sides. If there is a gap between the range and an adjacent cabinet, the gap must be closed prior to installing the range.

WARNING
FIRE
• 30 inches is the minimum vertical distance to combustible material above the cooktop stove. This distance may be reduced by using non-combustible construction in accordance with Table 2-6.7.2 in ANSI A119.2.
3. Cabinet dimensions needed for each model are shown in \textbf{CABINET & COUNTER CUT OUT CHART}. The cabinet cut-out must be located with respect to the minimum clearances to combustible materials as noted. When planning the location, consider curtains or other combustible materials installed around the range or cooktop.

Note: For models having suffix “N” (i.e., RA1732 BGPN) Countertops with an overhang must be notched as shown in the illustrations. The notch should be 7/16” minimum, both sides.

\section*{\textbf{WARNING}}

\textbf{FIRE AND/OR EXPLOSION}

- \textbf{KNIFE RACK INSTALLATION} - Gas supply pipe must be installed with clearance from knives contacting or cutting gas lines.

4. When the cabinet has been prepared according to the dimensions given and the gas line is in place, remove the range or cooktop from its packaging and position the range or cooktop in the opening.

5. Verify the range or cooktop is level from side to side and front to rear.

6. Remove the cooking grate(s), slide the range top back about 1/8", then lift up on one of the front corners (Fig 3) to remove the range top.

7. Fasten the range or cooktop in place with wood screws (not supplied) through holes in burner box. Care should be taken to not force the range mounting flanges to bend, which may cause the range or cooktop to be mounted too low in the cabinet cutout.

8. Make the gas connection. All openings in the cabinetry around the gas line must be closed at time of installation. RA, CA series with electronic ignition: Complete the electrical connections as shown in the \textbf{WIRING DIAGRAM}. For galley slide-out applications, it is highly recommended that the negative 12 volt connection be connected directly to the battery. Voltage supply must be between 9 and 13 VDC. Appliance electrical rating is 12VDC, 0.6A during sparking.

\section*{\textbf{CAUTION}}

\textbf{PRODUCT DAMAGE HAZARD}

- \textbf{Connect to 12VDC service only.}
- \textbf{DO NOT connect to a circuit fused for more than 3 amps.}
- \textbf{DO NOT hi-pot range unless electronic ignition system has been disconnected.}

9. Turn on the gas supply.

\section*{\textbf{WARNING}}

\textbf{EXPLOSION OR FIRE}

- \textbf{DO NOT use matches, candles or other sources of ignition to test fittings and gas lines for leaks.}

10. Check all connections for gas leaks using a non-corrosive leak detection fluid. Do not use a soap and water solution. Leak test in excess of 8 oz. per square inch (1/2 psi) of air pressure will invalidate warranty.

11. Replace range top (Fig 4-5). Range/cooktop is now ready for operation.

\section*{TOP BURNER OPERATION}

\section*{\textbf{WARNING}}

\textbf{BURN INJURY, FIRE AND/OR EXPLOSION}

- \textbf{Use range or cooktop only for use as described in this manual.}
- \textbf{DO NOT leave children alone or unattended in area where range or cooktop is in use. Never allow anyone to sit, stand, or climb on any part of the range cooktop. They could be burned or injured.}
- \textbf{DO NOT store things children might want above the range or cooktop. Children could be burned or injured while climbing on it.}
- \textbf{DO NOT wear loose or hanging garments when using the range or cooktop. They could ignite if they touch an open flame and you could be burned.}
- \textbf{Use only dry potholders. Moist or damp potholders on hot surfaces may result in burns from steam. Do not let the potholder touch an open flame. Do not use a towel or bulky cloth for a potholder. It could catch on fire.}
- \textbf{DO NOT heat unopened containers. They could explode. The hot contents may cause burns and container particles may cause injury.}
- \textbf{DO NOT use range or cooktop for warming or heating vehicle. You could be burned or injured, a fire could start, or deplete oxygen in the vehicle.}
- \textbf{DO NOT store flammable materials on, in, or near the range or cooktop. Any fumes can create an explosion and/or fire hazard.}

\section*{WARNING}

\textbf{BURN INJURY, FIRE AND/OR EXPLOSION}

- \textbf{ALL control knobs must be turned to OFF when not in use. Fire and/or burning hazard may occur if a burner is accidentally left ON.}
- \textbf{DO not operate range or cooktop if it is damaged or not working properly.}
- \textbf{Know where your vehicle’s main LP gas shutoff is located.}
- \textbf{Verify sufficient gas supply before attempting to light any top burner. Air in the gas supply line will significantly delay burner ignition, and a burner may light unexpectedly as the air in the line clears out and is replaced by LP gas; this unexpected ignition may burn you. Air may be introduced into the supply line when the vehicle gas bottle is replaced, during servicing of other gas appliances, etc.}
- \textbf{If any burner should extinguish (after initially lighting or due to accidental blow-out), turn all burner knobs clockwise, \(\rightarrow\) to OFF and WAIT FIVE (5) MINUTES before again attempting to light the burner.}
- \textbf{DO not touch top burners, burner grates, or other areas near top burners during and after use. Do not let clothing or other flammable materials to contact top burners or areas near top burners until they have had sufficient time to cool.}
- \textbf{Make sure the utensils you use are large enough to contain food and avoid boil overs and spills. Heavy splattering or spills left on the cooktop can ignite and burn you.}
- \textbf{DO not drop pans on the porcelain surface. Cracks or chips in the porcelain surface may result.}
- \textbf{Be sure that glass cooking utensils are safe for use on the cooktop. Only certain kinds of glass utensils are suitable for surface or top burner use without breaking due to the sudden changes in temperature.}
- \textbf{Never leave top burners unattended. A boil over could result and cause smoking and greasy spillovers that may ignite.}
- \textbf{Turn pan handles inward, but not over other top burners. This reduces the chance of burns due to bumping pan.}
- \textbf{Grease is flammable. Never attempt to burn grease to collect around top burners or on cooktop surface. Wipe spills immediately.}
- \textbf{DO NOT use water on grease fires. Never pick up a flaming pan. Smother a flaming pan with a tight-fitting lid or cookie sheet. Flaming grease outside of the pan can be extinguished with baking soda or a multipurpose dry chemical or foam-type fire extinguisher.}
- \textbf{Use care when lighting a top burner by hand. If the burner lights unexpectedly, or your hand is close to the burner, you may be burned.}
- \textbf{Burner flame should not extend beyond the edge of the cooking utensil. The flame could burn you and cause poor cooking results.}

1. Check that gas is on at shutoff valve.
2. \textbf{LIGHTING Top Burners:}
   a. All burner controls operate counter-clockwise, \(\leftarrow\) and must be pressed inward (toward the cooktop) to turn ON or LITE. Do not attempt to light more than one burner at a time.
   b. IMMEDIATELY light the burner by holding a lit match or a hand-held spark igniter designed for this purpose near the burner ports.
   c. To extinguish the top burner flame, turn the appropriate burner knob clockwise, \(\rightarrow\) to OFF.

\textbf{LIGHTING Top Burners with spark ignition:} (Fig 4-5)

a. Turn the appropriate burner knob counter-clockwise, \(\leftarrow\) to ON or LITE. Do not attempt to light more than one burner at a time.
   b. Turn the SPARK knob clockwise, \(\rightarrow\) one “click”. If the burner fails to light, continue turning the SPARK knob clockwise, \(\rightarrow\) until the burner lights.
   c. To extinguish the top burner flame, turn the appropriate burner knob clockwise, \(\rightarrow\) to OFF.

\textbf{LIGHTING Top Burners with electronic ignition:}

a. Turn the appropriate burner knob counterclockwise, \(\leftarrow\) to ON or LITE. This will automatically activate the ignition system, and all burners will begin to spark repeatedly. This is the “clicking” sound you will hear.
   b. The burner will light within five (5) seconds. Once the burner is lit, turn the knob counterclockwise, \(\leftarrow\) to the desired setting.
   c. To extinguish the top burner flame, turn the appropriate burner knob clockwise, \(\rightarrow\) to OFF.
   d. If 12 VDC power is not available to the ignition module for any reason, top burners may be lit manually. See instructions in “Lighting Top Burners”.

\section*{CAUTION}

\textbf{PRODUCT DAMAGE HAZARD}

- \textbf{DO NOT cook with the control knob set in the LITE position. Damage to the ignition module and burner electrodes may result.}
3. Proportional flow (linear) top burner valves are installed. Start cooking at the HI setting, then turn the control knob counter-clockwise \( \leftarrow \) to continue cooking and obtain best results. Use the following table as a guide until you get used to the setting.

<table>
<thead>
<tr>
<th>SETTING</th>
<th>RECOMMENDED USE</th>
</tr>
</thead>
<tbody>
<tr>
<td>LITE</td>
<td>To light the burner</td>
</tr>
<tr>
<td>HI</td>
<td>To start foods cooking</td>
</tr>
<tr>
<td>MED 9-6</td>
<td>To hold liquids at a boil</td>
</tr>
<tr>
<td>LOW - 5</td>
<td>To keep food warm</td>
</tr>
</tbody>
</table>

**PRODUCT DAMAGE HAZARD**

- **DO NOT** use oversized cookware. The pan should not be more than one inch larger than the burner grate. The maximum pan size is a 10-inch skillet. Oversized cookware will cause excessive heat build-up in the stove top and will result in damage to the burner grate, burner and cooktop.
- **DO NOT** use a broiler pan, griddle, or any other large utensil which covers more than one (1) top burner at a time. This will create excessive heat which may cause melting, sooting or discoloration damage to the burner grates, range top, or utensils.
- **DO NOT** leave an empty utensil, or one which has boiled dry, on a hot top burner. The utensil could overheat and damage the utensil or the cooking appliance.

---

**CAUTION**

**PRODUCT DAMAGE HAZARD**

**WARNING**

- FIRE, EXPLOSION, BURN INJURY, CARBON MONOXIDE POISONING

- **DO NOT** touch any inner surfaces of the oven or oven door, or the wire rack inside, or any utensils inside the oven during and after use until these areas have had sufficient time to cool. You could be burned or injured. During and after use, do not let clothing or other flammable materials contact these areas until they have had sufficient time to cool.
- **DO NOT** touch the outer surface of the oven door or the oven vent while the oven is in use. These areas become hot enough to cause burns. During and after use, do not let clothing or other flammable materials contact these areas until they have had sufficient time to cool.
- **DO NOT** cover the ventilation holes in the oven broiler shelf (shelf above oven burner). The air circulation inside the oven will be interrupted and cooking times will vary from normal; food may be burned or undercooked.
- **DO NOT** cover the oven vent openings while the oven is in operation; restricting the flow of combustion air may create a carbon monoxide poisoning hazard.
- **DO NOT** use oven as a storage area.
- If oven pilot should extinguish after initial lighting or due to accidental blowout, turn oven knob clockwise \( \leftarrow \) to OFF and wait five (5) minutes before again attempting to light oven.

1. Check that gas is on at shutoff valve.

2A. **LIGHTING THE OVEN PILOT - Match Lit**
   a. Push in oven control knob FIG 1-A and rotate counter-clockwise \( \leftarrow \) to PILOT ON - PUSH/HOLD.
   b. PUSH the knob in and HOLD it in while holding a lit match under the oven pilot FIG 1-C located near the back of the oven, under the broiler shelf FIG 1-B and to the right of the oven burner FIG 1-D.
   c. Continue to hold the oven control knob in for 5 seconds after pilot is lit. Release knob and verify pilot stays lit. Repeat steps (b) and (c) if pilot does not stay lit.

2B. **LIGHTING THE OVEN PILOT - Electronic Spark Lighting**
   a. Push in oven control knob FIG 1-A and rotate counter-clockwise \( \leftarrow \) to PILOT - PUSH/HOLD.
   b. PUSH the knob in and HOLD it in while observing the oven pilot FIG 1-C located near the back of the oven, under the broiler shelf FIG 1-B and to the right of the oven burner FIG 1-D.
   c. Continue to hold the oven control knob in for 5 seconds after pilot is lit. Release knob and verify pilot stays lit. Repeat steps (b) and (c) if pilot does not stay lit.

CONTINUE for both MATCH LIT and ELECTRONIC SPARK LIGHTING -

d. Set the oven control knob to PILOT PUSH/HOLD to maintain pilot flame. The oven and broiler are now ready for operation; see #3 below before proceeding. The oven pilot has been factory set and requires no further adjustment.

e. To extinguish the oven pilot, push in the oven control knob FIG 1-A and rotate clockwise \( \rightarrow \) to OFF. Extinguish all pilots when refueling or traveling.

3. **LIGHTING THE OVEN BURNER:**
   a. Light the oven pilot as described in #2 above.
   b. With the oven control knob set to PILOT PUSH/HOLD, push in and rotate the knob counter-clockwise \( \leftarrow \) to the desired temperature setting or to BROIL. The oven will pre-heat in approximately 15 minutes. For best results, always pre-heat the oven before use.
   c. To extinguish the oven burner, rotate the knob clockwise \( \rightarrow \) to PILOT PUSH/HOLD. The oven pilot will remain lit.
   d. For complete shutdown, push in and rotate the knob clockwise \( \rightarrow \) to OFF.

4. **USING THE BROILER:**
   a. Light the oven pilot as described in #2 above.
   b. Push in and rotate the oven control knob counter-clockwise \( \leftarrow \) to BROIL.
   c. Center a broiler pan under the broiler flame.
   d. Move and turn the food over frequently to ensure even browning and cooking.

Note: A 2-piece enameled broiler pan (MPD 51042) may be purchased from Atwood.

Note: Cooking times will be longer at higher attitudes (+4000 feet).

---

**MAINTENANCE**

**WARNING**

- BURN INJURY, FIRE AND/OR EXPLOSION

- **MAKE SURE** all controls are OFF and the range or cooktop is cool before cleaning.
- **MAKE SURE** that all cooktop surfaces, burner grates and burners are cool before cleaning or disassembling cooktop.
- **DO NOT** use oven cleaners, bleach, or rust removers on the cooktop or burner grates.
- **DO NOT** obstruct the flow of combustion and ventilation air.
- Keep appliance area clear of combustible materials, gasoline and other flammable vapors and liquids.
- Clean oven with oven cleaner only. Follow directions on the container.
- Never use a wire brush or metallic item for cleaning burner ports or orifices. Brush may “shed” bristles, that may lodge in the orifice or burner ports and cause a fire or explosion.

**CAUTION**

**PRODUCT DAMAGE HAZARD**

- **CLEAN** all surfaces as soon as possible after boil overs or spillovers.
- Use warm soapy water only to clean the burner grates, cooktops, painted surfaces, porcelain surfaces, stainless steel surfaces and plastic items on your range or cooktop. Do not use grit or acid-type cleaners.
- **DO NOT** use steel wool, or abrasive cleaners, or acid type cleaners such as chlorine bleach on your cooktop or grate systems. They will damage your range or cooktop. Use only non-abrasive plastic scrubbing pads.
- **DO NOT** allow foods containing acids (such as lemon or tomato juice, or vinegar) to remain on porcelain or painted surfaces. Acids may remove the glossy finish. Wipe up egg spills when cooktop is cool.
- **DO NOT** wash warm porcelain surfaces. Allow these areas to cool before cleaning. You could burn yourself, or the porcelain could crack.
- **PITTING** and discoloration will result if spills are allowed to remain for any length of time on stainless steel.
- **DO NOT** allow spillovers to remain on the burner caps. The caps could become permanently stained.
- When cleaning around the burners, use care to prevent damage to the electrode (if so equipped). If a sponge or cloth should catch the metal igniter electrode, it could damage or break the electrode. If this occurs, the burner will not light.
The owner’s cooking habits and cleanliness will affect the operation of the range or cooktop. Proper installation and care will help keep your range or cooktop looking and operating like new. Most cleaning can be performed using normal household items.

**RANGE & SLIDE-IN COOKTOP:**

1. To remove the range top:
   - All Models - Push firmly in the back of the top to slide the entire top backwards. While the top is slid backwards, lift up on one of the two front corners (Fig 3).
2. To replace the range top:
   - a. RV & CV Models - Place the top on the range (Fig 4) so that the tabs on the spring clips fit into the slots on the top (Fig 4-B). Push backwards on the top until the bracket on the front of the top fits into the notch in the front control panel (Fig 5).
   - b. RA & CA Models - Place the top on the range (Fig 4) so that the tabs on the spring clips into the slots on the top (Fig 4-B). Attach spark wires to burners (Fig 4-A), routing the wires away from the center of the burner. Rotate the top downward making sure that all three burner tubes fit up into the burner caps (Fig 4-C). This may be made easier by using a side to side motion when rotating the top down. Once the tubes are up into the burner caps push backwards on the top until the bracket on the front of the top fits into the notch in the front of the control panel (Fig 5).
3. To remove burner grates:
   - a. RV and CV Models - simply lift grate up and remove. Replace by placing two legs at a time into the retaining grommets.
   - b. RA & CA Models - lift grate up by rotating up away from center of stove (fig 2). Replace by placing legs into silicone retaining grommet and rotating back down on cooktop.

**RANGE MAINTENANCE & CARE INSTRUCTIONS**

**CARE OF PORCELAIN**

The grates and surface of the cook tops are coated with porcelain. Porcelain is a glass/ceramic coating glazed to the surface of the metal. Porcelain is designed to provide a surface that withstands high temperatures, has an attractive appearance and is easy to care for and clean.

**UNACCEPTABLE - WHICH WILL VOID YOUR WARRANTY**

- NEVER use steel wool, abrasive cleaners, or acid type cleaners such as chlorine bleach or dish detergents with lemon fruit acid on any part of your porcelain surface.
- NEVER drop pans on the cook top surface, you may crack or chip the porcelain surface.
- DO NOT crowd the oven with food more quickly.

**GENERAL COOKING INSTRUCTIONS**

To quickly bring liquids to a boil or to begin a cooking procedure use a high flame setting. Reduce the flame to a lower setting to continue cooking. Using a higher flame setting than is necessary to maintain a gentle boil will not cook food more quickly.

**COOKWARE**

Acquire cookware that fits the RV environment. Proper cookware will reduce cooking time, use less energy, and produce better cooking results.

**ACCEPTABLE**

- A heavy gauge (aluminum or copper) metal pan with a smooth flat bottom (no more than 10” diameter), straight sides, and a tight fitting lid.
- Cover pan with a lid, food cooks faster when covered, because more heat is retained.
- Lowering flame size, increases cooking efficiency.
- Use cookware with appropriate utensils.

**UNACCEPTABLE - WHICH WILL VOID YOUR WARRANTY**

Oversized cookware causes a build up of excessive heat, which results in damage to the burner grate, burners, and cook top. Including the following cookware - but not limited to:

- Griddles
- Any cookware that extends beyond 1” of the grate edge.
- Any cookware that comes into contact with the cook top.
- Woks with support rings which restrict air circulation around the burners. Excessive heat will cause grates and tops to lose their protective coating, becoming unsightly in appearance. Airflow is important for cooking, the warmed air must be allowed to mix with air around the burner.

**AIR CIRCULATION**

Warmed air must circulate freely throughout the oven for food to cook properly. To prevent undercooked or burned food:

- Do not cover or block ventilation holes in the oven broiler (shelf above the burner).
- Do not cover the bottom of the oven with aluminum foil to catch “over flow”.
- Do not cover oven racks with aluminum foil.
- Place the food to be baked in the center of the oven with 1”-2” inches space from the oven wall on all sides allowing at least 1”-2” of space on all sides of the container.
- Do not crowd the oven with assorted pans or block air passage with an oversized pan.

**STORAGE**

Dry all surfaces and burner box, then spray surfaces with an oil base substance to preserve the surface from rusting during long term storage. Wipe off oil coating before reuse.

---

**PREHEATING OVEN**

For best results, preheat the oven for 15 minutes before use. For baking, do not select a higher than required temperature to preheat the oven faster, it may have a negative effect on baking results.

**AIR CIRCULATION**

Warmed air must circulate freely throughout the oven for food to cook properly. To prevent undercooked or burned food:

- Do not cover or block ventilation holes in the oven broiler (shelf above the burner).
- Do not cover the bottom of the oven with aluminum foil to catch “over flow”.
- Do not cover oven racks with aluminum foil.
- Place the food to be baked in the center of the oven with 1”-2” inches space from the oven wall on all sides allowing at least 1”-2” of space on all sides of the container.
- Do not crowd the oven with assorted pans or block air passage with an oversized pan.
Atwood Mobile Products warrants to the original owner and subject to the below mentioned conditions, that this product will be free of defects in material or workmanship for a period of two years from the original date of purchase. Atwood's liability hereunder is limited to the replacement of the product, repair of the product, or replacement of the product with a reconditioned product at the discretion of Atwood Mobile Products. This warranty is void if the product has been damaged by accident, unreasonable use, neglect, tampering or other causes not arising from defects in material workmanship. This warranty extends to the original owner of the product only and is subject to the following conditions:

1. For two years from the date of the original purchase Atwood warrants that this product will be free of defects in material and workmanship with the exceptions noted below. This warranty includes reasonable labor charges required to remove and replace the part. Service calls to the customer's location are not considered part of these charges and are therefore the responsibility of the owner.

2. This warranty does not cover the following items classified as normal maintenance and/or customer damage.
   a. Damage, discoloration or scratches to porcelain enamel or other finishes from improper use and care.
   b. adjustment of gas pressure
   c. cleaning or adjustment of any burners
   d. cleaning or replacement of burner orifices
   e. cleaning or adjustment of pilot and thermocouple
   f. damage to glass
   g. products purchased for commercial or industrial use.

3. In the event of warranty claim the owner must contact in advance either an authorized Atwood Service Station or the Atwood Service Department. Warranty claim service must be performed at an authorized Atwood Service Station (a list will be provided at no charge) or as approved by the Atwood Service Department Atwood Mobile Products, 4750 Hiawatha Drive Rockford, IL 61103-12998 USA. Phone 815-877-5700.

4. Return parts must be shipped to Atwood Mobile Products “prepaid”. Credit for shipping costs will be included with the warranty claim. The defective parts become the property of Atwood Mobile Products and must be returned to the Consumer Service Department, Atwood Mobile Products, Greenbrier Operations, 6320 Kelly Willis Road, Greenbrier, TN 37073 USA.

5. This warranty applies only if the unit is installed according to the installation instructions provided and complies with local and state codes.

6. The warranty on replacement parts is the unused portion of the original warranty period.

7. Damage or failure resulting from misuse (including failure to seek proper repair service) misapplication, alterations, water damage or freezing are owner's responsibility.

8. Atwood does not assume responsibility for any loss of use of vehicle, loss of time, inconvenience, expense for gasoline, telephone, travel, lodging, loss or damage to personal property or revenues. Some States do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

9. Any implied warranties are limited to two (2) years. Some States do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. This warranty gives you specific legal rights and you may also have other rights, which may vary, from State to State.

10. Replacement parts purchased outside the original cooking warranty carry a 90 day warranty. This includes the part at no charge and reasonable labor charges to replace it.

This Atwood product is designed for use in recreation vehicles for the purpose as stated in the ‘data plate’. Any other use, unless authorized in writing by the Atwood Engineering Department, voids the warranty.

Atwood/Wedgewood Vision Products include range/oven, drop-in, slide-in and high pressure stoves.

- **$20** Mileage travel expense

**Extended Service Contract**

- **Mileage Travel Expense**—$20.00

Upon receipt of this completed card together with your check or money order, Atwood will send you a written confirmation of the options you selected.
Save on these popular accessories!
Order a broiler pan, a lift-up cooktop cover or a bi-fold cover/backsplash direct from Wedgewood and save.

Full-Size Broiler Pan
This beautiful two-piece broiler pan, designed especially for your Wedgewood range, has a durable, easy-to-clean porcelain enamel finish for trouble-free broiling.

Bi-Fold Range Cover and Backsplash
This two-in-one accessory provides extra counterspace when closed and protects the wall behind the stove while you are cooking.
Available in white or black.

Lift-Up Drop-in Cover
This attractive cover for Wedgewood drop-in units adds valuable counter space—a must for camping. Available for two-and-three burner units in stainless steel. The cover comes completely assembled, with mounting screws and rubber corner guards.

(D Models Only)

Please send me these Wedgewood accessories.
Mail in orders only. No C.O.D.s or charge card orders.
