First Alert

M6-3004-00X  M  01/2002

IMPORTANT! Please read carefully and save.

Do not puncture or burn any fire extinguisher. The contents are toxic. The agent/powder is not toxic, but can irritate skin. When using this unit, avoid breathing the powder. Always ventilate the area after use.

Never leave this extinguisher in a car, on the dashboard, or in a vehicle. The contents will not be effective. Store this extinguisher in a cool, dry place.

For more information about fire extinguishers, consult the NFPA Standard No. 10, Portable Fire Extinguishers, available from the National Fire Protection Association, Inc., Batterymarch Park, Quincy, MA 02269, USA.

Important Information About This Fire Extinguisher

• When to Install This Extinguisher
• How to Install This Extinguisher
• How to Check and Inspect the Extinguisher
• How to Use Your Fire Extinguisher in a Fire Emergency
• After the Fire is Extinguished
• IF Your Fire Extinguisher Needs Service
• Disposing of a Used Extinguisher
• Limited Warranty

1. Review the manual and instruction label with everyone in your home.
   • Class A rating: The agent/powder is suitable for fighting fire caused by wood, paper, clothes, rubber, and some plastic.
   • Class B rating: The agent/powder is suitable for fighting fire caused by grease, oil, gasoline, kerosene, and other flammable liquids.

2. Read the instructions regularly. In an emergency, you will not have time to read instructions.

WHERE TO INSTALL THIS EXTINGUISHER

This extinguisher is designed to be used in your car or other vehicle. It has a totally enclosed mounting bracket (MB) that keeps it out of the unit from discharging accidentally. We recommend you mount the extinguisher to prevent it from being expelled from the vehicle in an accident or collision. Install this extinguisher in a safe and accessible location. The extinguisher should be visible at all times.

This Fire Extinguisher may be mounted:
• In a trunk of a vehicle
• On an inside panel of a vehicle

DO NOT mount this Fire Extinguisher:
• To the dashboard of the vehicle
• To the exterior of a vehicle
• To the engine of a vehicle
• On or near any other source of heat

DO NOT mount this Fire Extinguisher to use on each class of fire!

1. Be sure the extinguisher is rated to fight the type of fire most likely to occur in the area you choose to install it. Since house-
