SAVE THESE INSTRUCTIONS

This oven, like any other microwave cooking appliance, can damage your oven. Always add a small amount of water to dry food to prevent the food from burning. Stirring, adding moisture, and using microwave-safe containers will prevent burning.

PREPARING THE FOOD

Always use microwave-safe containers and cover the food with a lid or vented plastic wrap. This will help retain moisture and prevent burning. Always leave at least a 1/2 inch of space between the food and the cover to allow steam to distribute evenly. Using the microwave for defrosting is not recommended. Provided you keep these precautions in mind, your microwave makes cooking easier than conventional cooking.
